

AUDIO / VIDEO REQUIREMENTS

Computer, Projector and Screen:

- Les will be using a Macbook Pro, and will need an adapter via USB-C port to HDMI - need all cables and/or usb-c flash drive for transferring.
- Production can use Les' MacBook Pro or their own Mac computer.
- High-quality 4k projector.
- Minimum 8-foot screen depending on size of audience (The larger and higher the screen, the better)
- Teleprompter if possible.

Microphone and Audio:

- Wireless lavalier or countryman microphone
- If production uses Les' computer, please run sound through an AUX cable, not HDMI. Les may control the volume via his wireless clicker which is only possible if the sound runs from his computer using an AUX cable.
- Professional sound system fitting to size of audience

Stage and Lighting:

- Podium
- Stage lights are encouraged. The room should be dark so that the projected Keynote is vivid on the screen(s).
- Please dim the lights when Les plays videos

Beverage:

- Please have three (3) bottles of water or cups of water available to Les while on stage.

Audio and Video System Testing:

- Les would like to meet with the production team at least 4 hours prior to his keynote for setup and sound check.
